| About the Author ..... | <i>ix</i>   |
| Acknowledgments .....  | <i>xi</i>   |
| Introduction .....     | <i>xiii</i> |

## **Part One    Databases ..... 1**

### **Chapter 1    Accessing Databases with DB..... 3**

|  |    |
|--|----|
| Exploring a Simple DB Example .....                | 3  |
| Introducing DSNs .....                             | 4  |
| Sending Queries and Retrieving Results .....       | 5  |
| Understanding Quoting and Placeholders .....       | 9  |
| Examining Data Retrieval Convenience Methods ..... | 13 |
| Understanding Query Information .....              | 16 |
| Running a Query Multiple Times .....               | 17 |
| Introducing Sequences .....                        | 20 |
| Introducing Error Handling .....                   | 20 |

### **Chapter 2    Accessing Databases with ADODB..... 23**

|                                     |    |
|-------------------------------------|----|
| Connecting and Simple Queries ..... | 23 |
| Introducing Record Sets .....       | 27 |
| Understanding Error Handling.....   | 32 |
| Introducing Sequences.....          | 35 |
| Generating HTML .....               | 36 |
| Caching.....                        | 49 |
| Exporting Data.....                 | 50 |

## **Part Two    HTML ..... 53**

### **Chapter 3    Using HTML\_QuickForm for Form                  Processing..... 55**

|                                      |    |
|--------------------------------------|----|
| Creating and Displaying a Form ..... | 55 |
| Processing Submitted Data .....      | 78 |
| Setting Validation Rules .....       | 82 |

|                   |  |            |
|-------------------|--|------------|
| <b>Chapter 4</b>  | <b>Templating with Smarty.....</b>                                 | <b>93</b>  |
|                   | Installing and Configuring Smarty .....                            | 94         |
|                   | Understanding Basic Smarty Concepts .....                          | 96         |
|                   | Implementing Conditional Logic .....                               | 110        |
|                   | Looping and Cycling Through Data .....                             | 113        |
|                   | Including Other Files and Templates .....                          | 124        |
|                   | Processing Text .....  | 129        |
|                   | Caching Template Output .....                                      | 140        |
|                   | Putting It All Together .....                                      | 144        |
| <br>              |  |            |
| <b>Part Three</b> | <b>XML .....</b>   | <b>149</b> |
| <br>              |  |            |
| <b>Chapter 5</b>  | <b>Performing Event-Based XML Parsing<br/>with XML_Parser.....</b> | <b>151</b> |
|                   | Handling Tags and Character Data .....                             | 152        |
|                   | Handling Processing Instructions .....                             | 160        |
|                   | Handling Nested Tags .....   | 163        |
|                   | Using Per-Element Methods .....                                    | 165        |
|                   | Specifying Character Sets .....                                    | 168        |
| <br>              |  |            |
| <b>Chapter 6</b>  | <b>Developing Lightweight Web Services<br/>with XML_RPC.....</b>   | <b>171</b> |
|                   | Choosing XML-RPC .....   | 171        |
|                   | Calling XML-RPC Procedures on Another Server .....                 | 177        |
|                   | Serving XML-RPC Methods .....                                      | 180        |
| <br>              |  |            |
| <b>Chapter 7</b>  | <b>Developing Heavyweight Web Services<br/>with SOAP.....</b>      | <b>187</b> |
|                   | Choosing SOAP .....  | 187        |
|                   | Installing SOAP .....  | 188        |
|                   | Making SOAP Requests .....   | 188        |
|                   | Serving SOAP Requests .....  | 199        |
|                   | Exploring Further .....  | 213        |

|                       |  |                |
|-----------------------|--|----------------|
| <b>Chapter 8</b>      | <b>Performing Easier XML Parsing with SimpleXML .....</b>                    | <b>215</b>     |
|                       | Creating SimpleXML Objects .....   | 215            |
|                       | Working with SimpleXML Objects .....   | 217            |
|                       | Working with Namespaces .....  | 220            |
|                       | Searching with XPath .....   | 221            |
| <br><b>Part Four</b>  | <br><b>Networking .....</b>  | <br><b>223</b> |
| <b>Chapter 9</b>      | <b>Sending Mail.....</b>   | <b>225</b>     |
|                       | Sending Plain-Text Mail Messages with PEAR Mail.....                         | 225            |
|                       | Sending MIME Mail Messages with Mail_mime.....                               | 229            |
| <br><b>Chapter 10</b> | <br><b>Working with Authentication, Users,<br/>and Passwords.....</b>        | <br><b>241</b> |
|                       | Using the Auth Module .....  | 241            |
|                       | Auth_HTTP .....  | 260            |
| <br><b>Part Five</b>  | <br><b>Debugging, Caching,<br/>and Optimizing .....</b>                      | <br><b>263</b> |
| <b>Chapter 11</b>     | <b>Understanding PHP Internals.....</b>                                      | <b>265</b>     |
|                       | Going from Source File to Output.....  | 266            |
|                       | Seeing How a Code Cache Works .....  | 272            |
|                       | Seeing How a Debugger Works .....  | 272            |
|                       | Examining Some Differences Between the Internals<br>of PHP 4 and PHP 5 ..... | 273            |
| <br><b>Chapter 12</b> | <br><b>Profiling and Debugging with Xdebug....</b>                           | <br><b>275</b> |
|                       | Installing Xdebug .....  | 275            |
|                       | Tracing Functions .....  | 276            |
|                       | Profiling .....  | 283            |
|                       | Using Remote Debugging .....   | 286            |

|   |                |
|---|----------------|
| <b>Chapter 13 Accelerating with Code Caches .....</b> | <b>297</b>     |
| Working with APC: The Alternative PHP Cache .....     | 298            |
| Working with ionCube PHP Accelerator .....            | 307            |
| Working with Turck MMCache .....                      | 317            |
| Benchmarking Cache Performance .....                  | 328            |
| <br><b>Index.....</b>                                 | <br><b>331</b> |
